INTRODUCTION

THIS Catalogue was designed to meet the general requirements of Prospective Clients and introduces to Home Builders and others interested in Industrial, Commercial and Alteration work an attractive range of modern Plumbing Fixtures. No attempt has been made in this limited space to show the complete line supplied by Crane Service, but enough is shown to cover a wide field and to assure you that there is no condition this service will not meet. Crane goods may be procured through your plumbing and heating contractor.

Working in conjunction with our factories is a chain of branch houses throughout the country, with show rooms where Crane goods may be examined and procured.

These show rooms are at your service and you are free to use them to gain information or make selections of fixtures.

CRANE BEAUTY IN THE OPEN

CRANE QUALITY IN ALL HIDDEN FITTINGS

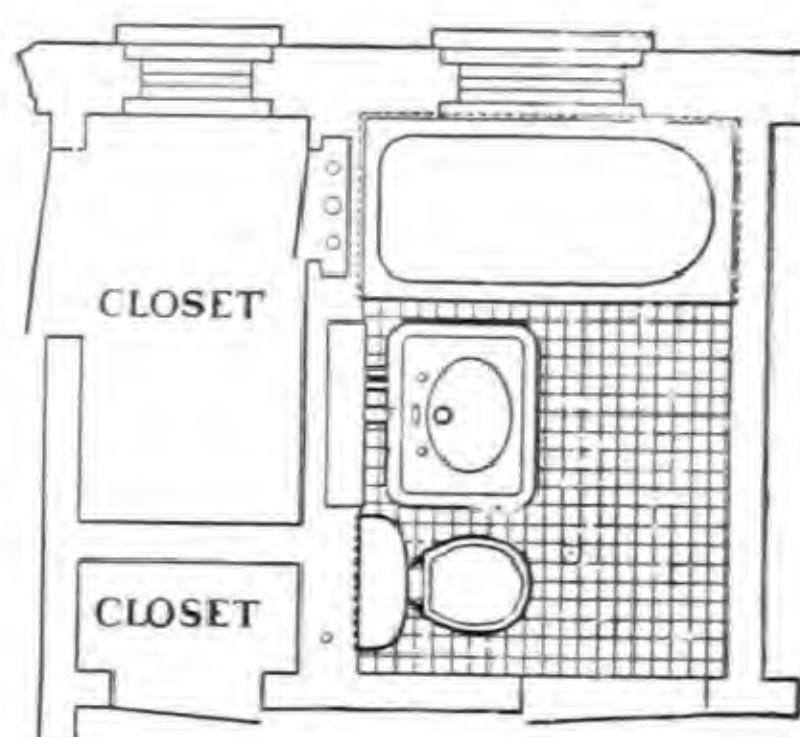

CRANE MODEL BATHROOM "F"

This bathroom is suitable for a small home or apartment building, and illustrates what can be done where space is limited.

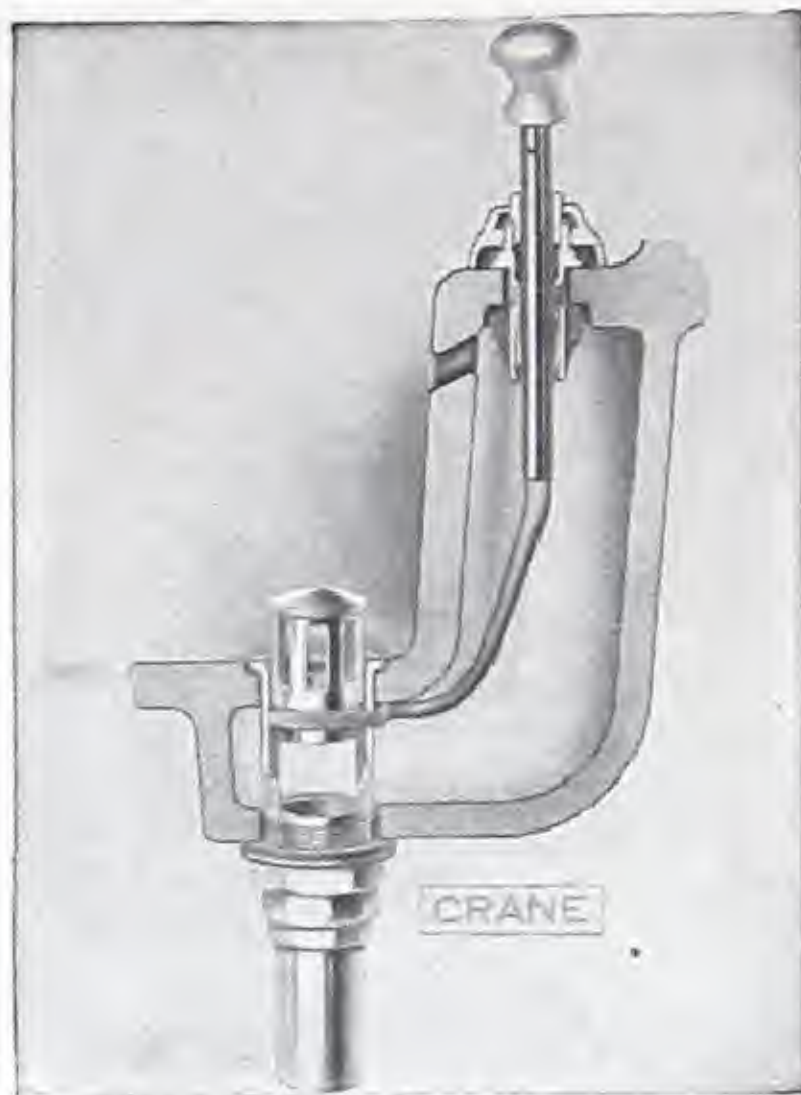

The "Modus" tub is a one-piece enameled iron fixture and is tiled in at the back and both ends. There is an overhead shower and a curtain.

The "Nova" lavatory is used with a combination faucet and a Vitroware soap dish.

The "Saneto" closet with Vitroware tank, a medicine cabinet and a selection of bathroom trimmings, complete this very satisfactory room.

SIZE 5 x 7 1/2 FEET

THE "SECURO" WASTE

The "SECURO" Waste shown in connection with Crane lavatories is a quick draining, direct lift pop-up, with extra large unobstructed outlet.

The quick rush of water from the basin carries practically all the foreign matter held in suspension to the trap, leaving the bowl in a sanitary condition.

This waste will drain the lavatory in approximately seven seconds and is simple in design, containing only two moving parts.

The operating stem is concealed in the overflow, reducing the number of metal parts to be kept clean.

The plug is positively closed by the handle.

C 220-M1

Crane "CORWITH" Twice Fired Vitreous China Pedestal Lavatory with Integral Overflow and Splash Lip; New Design Square Bowl; Cast Brass Wall Brackets; "SECURO" Combination Compression Supply and Quick Draining Direct Lift Waste Fixture with Renewable Seats, Metal Spout, Shampoo Connection, Four-Arm Indexed All-China Handles and China Escutcheons on Valves and China Knob on Waste; $\frac{3}{8}$ " Iron Pipe Size and Weight Supplies to Wall with Wheel Handle Compression Stops and Metal Wall Flanges; $1\frac{1}{2}$ " Cast Brass "P" Trap with Cleanout and Metal Wall Flange. CRANE PLUMBING EQUIPMENT FOR HOSPITALS

THE necessity for the accommodation and proper handling of surgical cases, as well as the treatment of various diseases, has created a demand for many new hospitals and the enlargement, remodeling and improvement of the old ones.

No attempt has been made in this catalogue to show the line of Crane Hospital Plumbing, but a special catalogue known as No. 605-C and devoted exclusively to the latest Plumbing equipment for the needs of institutions of all types will be forwarded upon request to the nearest Crane Branch.

A representative line of Crane Fixtures for Hospitals is on display at our Exhibit Rooms with experts in charge to assist in solving the problem of the proper appliances in each case.

In providing the recess for styles E and F care must be taken that the frame is square and of proper size.

Three-quarter inch grounds are required, and the plaster must come up flush and smooth to them.

The TOP of the opening is 6 feet 2 inches from the floor, which will bring the mirror in proper position for the average adult.

The recessed lockers require a depth of 4 1/4 inches from the face of the plastered wall to the back of the recess, and they project 1 1/4 inches from the wall.

CRANE AUTOMATIC WATER SUPPLY SYSTEM

C 51198

These systems are complete units ready for plumbing connections and electric service wires. They can be used wherever electric current is available.

No. 215A is designed for the average home of two to five persons. No. 215B for homes of two to six persons and No. 215C for homes of two to eight persons. They will supply all water necessary for bath, laundry and kitchen.

Tanks are galvanized both inside and outside.

All seams are electrically welded and tanks are tested to 150 pounds hydraulic pressure.

The tank and pumping units rests upon the same base with four supporting legs elevating it from the floor.

C 31850

THE ROYAL NON-INSULATED AUTOMATIC STORAGE GAS WATER HEATER

The Royal is for heavy duty service. It has double extra heavy galvanized steel tank, instant-action thermostat, two burners and heating elements for double quick recovery. The mechanism and materials are especially adapted to its job of supplying large quantities of "instant hot water." It is built in two sizes.

Size No. 75, 65-gallon capacity. For larger homes having extra bathrooms and club type showers. Price \$220.00 at factory. No. 120, 93-gallon capacity. A good size for apartment buildings, small hotels, office buildings, etc. Price \$240.00 at factory.

When greater amounts of stored hot water are desired, two Royals of either size can be operated in tandem or with additional storage tank.

THE MARVEL HAND OPERATED STORAGE HEATER

The Crane Marvel Heaters, hand operated and storage type, single unit heaters, not insulated, are supplied in two sizes at exceptionally low prices.

	Capacity	Price
Size No. 24.....gals.	17	\$29.00
Size No. 32.....gals.	23	31.00

C 31852

PREMIER INSULATED AUTOMATIC STORAGE GAS WATER HEATER

C 38160

The "Premier" Heater keeps a tank of steaming hot water ready for use whenever needed. Drawing hot water at any fixture brings the heater into operation automatically so that the hot water used is very quickly replaced.

Completely insulated and protected by metal casing. Finished gray enamel with nickel trim.

When the "Premier" is installed it is only necessary to light the pilot, open the gas cock and the hot water service is in operation. No further attention is required.

In a few minutes the storage supply will be heated to the thermostatically set temperature. This is usually 130°F., but it is adjustable 80° to 190°. Instantly this set temperature is reached, the thermo-valve

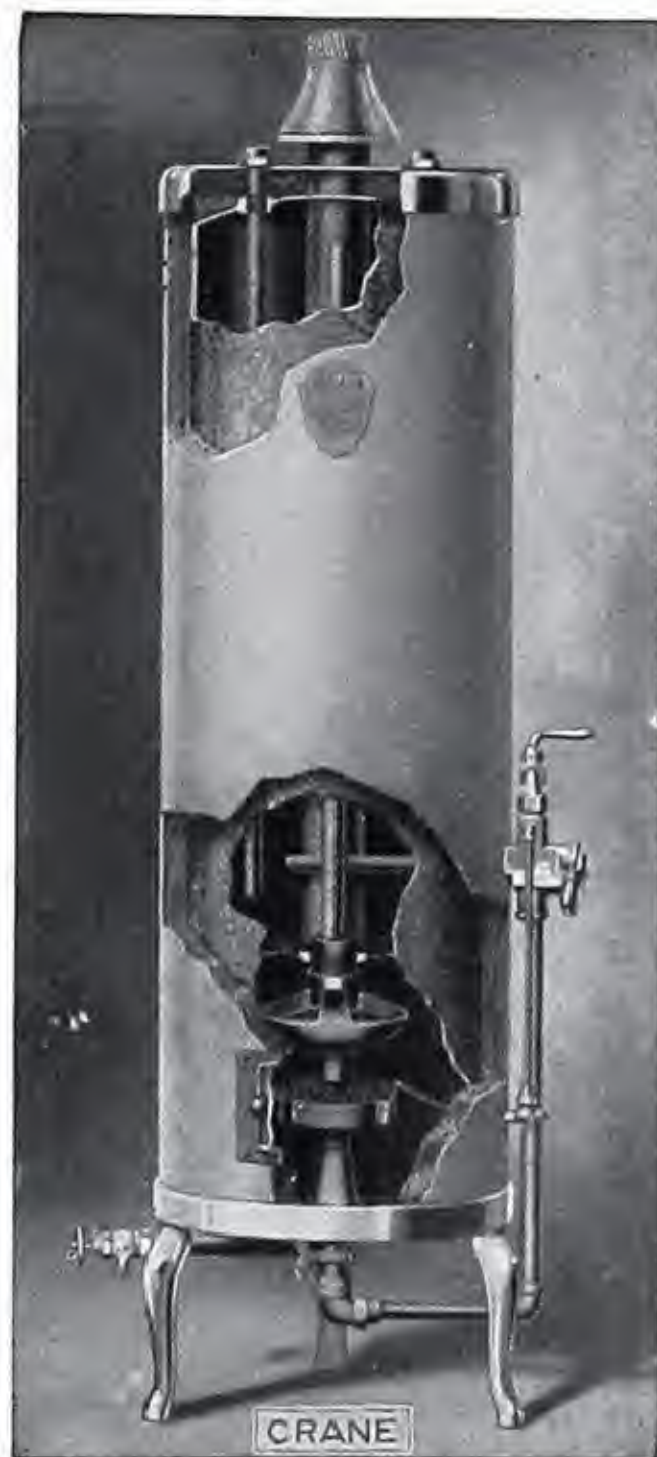

with a quick movement shuts off the gas supply to the main burner, and a tank full of steaming hot water is ready for instant service.

When water is drawn from this storage, fresh water from the mains comes in at the bottom of the tank, chills the thermo rod which causes the automatic gas valve to open and the heating process immediately begins. Thus the storage supply of hot water is maintained and is always ready.

Size 2: For homes with one bath, kitchen sink, usual number of lavatories and laundry trays.

Size 3: For homes with two baths, kitchen sink and usual number of lavatories and laundry trays.

Size 4: Double burner equipment—quick recovery. For homes and apartments with three or four baths, large barber shops, restaurants, clubs, etc.

C 38160

No.	Size Heater Inches	Overall Height on Base Inches	Capacity Gallons	Price Each
2	16x50	61	23	98.00
3	18x50	61	31	130.00
4	22x50	61	48	198.00

All sizes are furnished with hot and cold water connections 61½ inches from floor. Gas connection at thermo-valve, 31½ inches from floor.

KEYSTONE, made in two sizes:

Size No.	2-20

Price	\$90.00

The Keystone, with heavy copper tank, and with brass heating element, brass connections and full size copper pipes can be supplied and we shall be glad to furnish prices on application.

SOFT WATER FOR EVERY HOUSEHOLD NEED

C 46248

At every faucet you now can have running water as soft and fresh as falling rain. For the CRANE-WARLO WATER SOFTENER takes the harsh lime and magnesia out of hard water. No chemicals of any kind are added. Only the destructive minerals are removed. Then, everything done with water is improved. Meats and vegetables are tenderer, tea and coffee more flavorful. Shampooing, washing, and bathing reach real luxury. Clothes wash whiter and last longer. And the soap savings alone practically repay the entire investment.

Household Units are made in sizes.

RADIATORS, BOILERS AND HEATING MATERIALS

IN this catalogue we are able only to show a few of the many lines of Radiators and Boilers which we handle, but one of our representatives will gladly supply any information upon request.

The close touch with the heating needs and practices together with the use of high-grade materials, concentration in production and scientific thermal tests which we apply, enable us to offer values unequalled.
